

Asia-Pacific Parliamentary Forum – Natadola Beach Fiji

Date: 15th January – 18th January 2017

Location: InterContinental Golf Resort and Spa

Scope of work:

We were required to provide SI for 6 languages (Russian, Spanish, Japanese, Korean, Chinese and Bahasa Indonesia) for the main plenary as well as 84 Wireless Dcentis Microhpones, 356 Receivers and Headphones and 2 Dome Cameras.

In the three breakout rooms we provided a total of 65 Wireless Dcentis Units.

Any challenges or something interesting or unique about the event

The plenary changed layout three times during the event to allow for the different seating arrangements for the different meetings. By using Wireless Dcentis rather than NG we were able to quickly adapt to the new seating layout.

There was also limited space in the plenary for the booths so the organisers agreed with the Bahasa Indonesia interpreter that they would be in an adjacent room – the dome cameras enabled the interpreter to see each delegate as they spoke on a LCD monitor in the booth without the need for a camera man to continually adjust the camera to face the speaker.
